

Mentor Reflection

When you began your participation in Marquette's PFFP program, you developed Mentor Plan as an initial step in charting your course through the PFFP program. As you near the end of your participation in the PFFP program, take a few minutes to reflect on your initial Mentor Plan, including reflecting on the interactions you had with your mentor, how you would pursue future mentor relationships, your main takeaways from your mentor interactions, and how this experience will impact your future mentoring. ***Please answer these questions with at least one paragraph.***

Describe notable interactions and/or collaborative activities you had with your mentor(s).

What would you do similarly (or differently) in pursuing future mentor relationships?

What were your notable takeaways from your relationship(s) with your mentor(s)?

How might your relationship(s) with your mentor(s) inform your future role as a mentor?
